Experience

Dexian Bangladesh

AI/ML Application Developer

February 2026 – Present

Dhaka, Bangladesh — Full-time

Inspectra — AI-Powered Security Assessment Platform

- Developed an automated penetration testing platform orchestrating a multi-phase security pipeline combining SAST, DAST, and AI/LLM red-teaming workflows.
- Integrated the **Claude Agent SDK** and **Claude AI** to analyze, correlate, and prioritize findings from industry-standard security scanning and vulnerability assessment tools across SAST, DAST, and red-teaming categories.
- Implemented multiple engagement modes covering OWASP Top 10 and LLM Top 10 vulnerability categories.
- Built automated DOCX security report generation and **Azure Blob**-based report delivery pipelines.
- Developed scalable backend APIs with **FastAPI** and integrated with **Next.js** frontend; containerized full stack using **Docker**.

HireNEXT — AI-Powered Recruitment Platform

- Contributed to the development of an AI-powered recruitment platform using Next.js, TypeScript, Supabase, PostgreSQL, and Azure OpenAI to automate modern hiring workflows.
- Built AI-driven features for job description generation, CV analysis, candidate shortlisting, and interview preparation using Azure OpenAI.
- Implemented secure authentication and authorization using **JWT**, **RBAC middleware**, **RLS policies** and **rate limiting** for protected and scalable API access.
- Developed scalable frontend and backend functionalities with optimized database operations, real-time notifications, and automated recruitment workflows.

Selopia

Software Engineer (Golang)

September 2025 – January 2026

Dhaka, Bangladesh

HR Management Software — Enterprise HR Solution

- Developed secure REST APIs with **Go (Iris)** and **GORM** for employee and workforce management on **PostgreSQL**.
- Implemented middleware-based access control, JWT authentication, structured validation, and advanced filtering/pagination.

Depot Sync System — Distributed Synchronization Platform

- Developed a distributed synchronization system between remote and local pharmacy software using Go, Iris framework, and GORM ORM.
- Managed MySQL-based data synchronization for pharmacy orders and inventory across distributed systems.
- Implemented concurrent sync workflows using Goroutines and channels for real-time asynchronous processing.
- Built conflict resolution, retry mechanisms, and live order consistency handling across distributed platforms.
- Used Redis for sync state management and queue optimization to reduce latency and improve reliability.
- Ensured data integrity using GORM transactions during cross-system inventory and order synchronization.

Selopia

Golang Developer Intern

April 2025 – August 2025

Dhaka, Bangladesh

School Management System — Production-Ready Enterprise Platform

- Developed a production-ready School Management System using Go (**Iris framework**) and **GORM**, covering curriculum, routine, academic, and result management modules.
- Designed scalable **PostgreSQL** database architecture and implemented optimized RESTful APIs for complex academic workflows.
- Integrated JWT authentication, role-based authorization, structured validation (GoValidator), centralized error handling, and advanced filtering/pagination using Morkid Pagination.
- Used **Redis** caching to optimize frequently accessed academic and routine data, improving API performance and reducing database load.
- Implemented GORM-based database transactions to ensure data consistency and integrity in critical academic operations.

Skills

Programming Languages: Golang, C, Python, Java, SQL

Go Ecosystem: Iris, Gin, GORM

Machine Learning: Supervised Unsupervised Learning, Deep Learning (CNNs, RNNs, GANs), Reinforcement Learning

NLP: Text Classification, Sentiment Analysis, Named Entity Recognition, Transformers (Hugging Face)

Data Engineering: Pandas, NumPy

API Development: RESTful APIs, RBAC, Middleware, Bruno, Insomnia, Postman

Databases: PostgreSQL, MySQL, MS-SQL, Redis (Caching)

Backend & Architecture: Microservices, Concurrency Patterns,

System Design, WebSockets, Distributed Systems

Web Development: HTML5, CSS , React , NextJS

AI & LLM: Claude Agent SDK, Claude AI, LangChain, RAG Pipelines, Prompt Engineering, LLM Integration, Embedding Models

Frameworks & Libraries: FastAPI, React, Next.js, TypeScript, Tailwind CSS, TensorFlow, PyTorch, Scikit-learn

DevOps & Cloud: Docker, Azure, AWS, Terraform, CI/CD, Git/GitHub

Languages: English (Fluent), Bangla (Native)

Education

Brac University <i>MSc. in Computer Science and Engineering</i> <i>Ongoing</i>	2026
Ahsanullah University Of Science and Technology <i>Bachelor of Science in Computer Science and Engineering</i> <i>CGPA:3.834</i>	2019 – 2023

Personal Projects

- ”Check Inn” — Hotel Management System — [Github](#)

 - Java-based hotel management system built with JavaFX 15, JDK 1.8, and MySQL. Automated reservations, managed customer and staff records, and generated billing slips through a user-friendly interface.
- AirRush** — Desktop Game — [Github](#)

 - 2D side-scrolling game written in C with iGraphics. Features two playable levels, obstacle avoidance, coin collection, a persistent high score system, and pause/resume functionality.
- Reader’s Den** — Online Bookstore App — [Github](#)

 - Android app for online book shopping with inventory management, customer billing, and an intuitive interface compatible with most Android devices.
- BazarSodai** — [Github](#)

 - Online marketplace for daily essentials built on MVC .NET architecture in C#. Includes product management modules, customer ordering, and home delivery workflows.

Publications

Debopriya Deb Roy, **Israt Moyeen Nouri** and Md Aminur Rahman ”Towards Better Misogyny Detection in Bangla: Improved Dataset and Cutting-Edge Model Evaluation” -2024 6th International Conference on Sustainable Technologies for Industry 5.0 (STI), 14-15 December, Dhaka

Achievements

Dean’s List of Honors (Bachelor of Science)	2023
